

LRM30 - METAL BAFFLE 30 6" LINE VOLTAGE TRIMS

5 3/4"

7 1/2"

SPECIFICATION

120V/CFL/HID 75W Max R30/PAR30
MED E26

Application: Baffle downlights are used to minimize unwanted glare from the lamp source while providing a budget friendly design to provide general ambient light to an environment.

While the low reflectance level of black makes it the most effective color for baffle trims, white baffles have become the most popular option. The benefit of white baffles is that the trims blend with the ceiling when the lights are turned off. They are suitable for general illumination of residential and light commercial ceilings up to 9 feet. For a room with a typical eight-foot high ceiling, space 6" downlights apart approximately seven feet apart for general lighting applications.

Mounting: Steel pressure springs mounted on trim to ensure positive retention inside housing.

Baffle Finish: Die-formed aluminum baffle ridges eliminate stray light. Available in White Baffle/ White Polycarbonate Ring, Black Baffle/ Black Polycarbonate Ring, Black Baffle/ White Polycarbonate Ring and All Natural Metal Ring.
