Long-Range Wireless Switch  
with Remote Control Fob Bundle

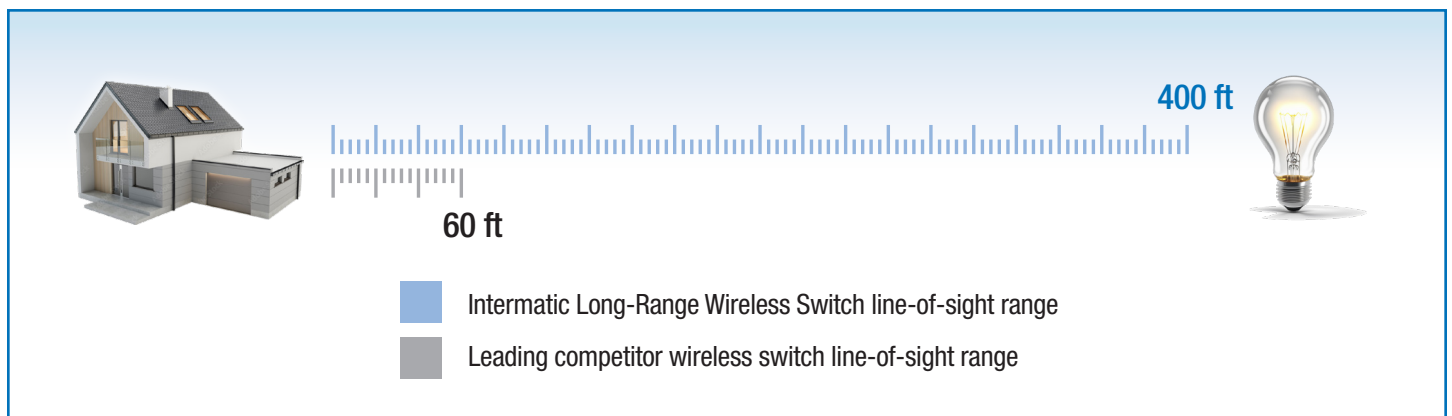

**RC-LRS1-WH**  
Long-Range Wireless Switch

## Simple Control That Goes The Distance

Enhance your outdoor experience with a Long-Range Wireless Switch from Intermatic. Our simple control makes it easy to turn landscape lights, pool lighting, and other outdoor lighting loads ON and OFF with the push of a button.

The in-wall switch and wireless fob allow for convenient control across a 400 ft range, saving homeowners the hassle of walking outside to manually flip a switch. The Long-Range Wireless Switch uses 915 MHz wireless technology, which allows the signal to bypass obstructions and metal enclosures. Each switch supports a single lighting load while each fob can control up to two switches.

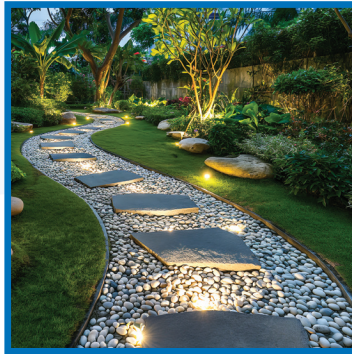

## Best-In-Class Range

Choose the **Long-Range Wireless Switch** for applications ranging from pools and landscapes to sheds and outbuildings.

Nicheless Pool Lighting

Landscapes

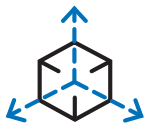

Sheds and Outbuildings

## Features & Benefits

### Convenient Control

Easily turn landscape lights, pool lighting, and other lighting loads ON and OFF with the push of a button.

### Extended Range

Control your outdoor lighting from up to 400 feet away with our long-range wireless fob.

### Obstruction-Free Signal

Built-in 915 MHz wireless technology ensures reliable performance, even through obstructions and metal enclosures.

### Two-Channel Functionality

Each fob can control two separate lighting loads simultaneously (e.g., nicheless pool lights and landscape lights).

### Hassle-Free Operation

Save time and effort by avoiding the need to manually flip switches outdoors.
